# NEW HAMPSHIRE DEPARTMENT OF ENVIRONMENTAL SERVICES

APPLICATION FOR THE CONSTRUCTION OF NEW AND SUBSTANTIALLY MODIFIED PETROLEUM ABOVEGROUND STORAGE TANK (AST) FACILITY

| STATE USE ONLY:  |
|------------------|
| DATE RECEIVED:   |
| DATE ISSUED:     |
| MUNICIPAL NOTIF: |
| FACILITY NUMBER: |

## New Hampshire Department of Environmental Services

Waste Management Division
Oil Remediation and Compliance Bureau

**EXISTING FACILITY I. D. NUMBER:** 

Page 1 of 6

P.O. Box 95 Concord, New Hampshire 03302-0095 Telephone: (603) 271-3644

| CERTIFICATION OF MUNICIPAL NOTIFICATION                                     |   |   |
|---|---|---|
| To meet the requirements of RSA 541-A:22, the undersigned certifies that on |   | _, a copy of this completed application was |
| mailed to the Fire Chief of   | (Date) (the town in which the facility is located). |   |
| Date:   | Signed:   |   |
|   | (Applicant  | :)  |
| Name and Distance to Nearest Surface Water:                                 |   |   |

- 1. Per Env-Wm 1402.17: At least 45 days prior to commencing construction or installation of a new or replacement AST system with an oil storage capacity of more than 660 gallons, the owner shall submit complete plans and specifications to the Department of Environmental Services.
- 2. Per Env-Wm 1402.17: All plans and specifications shall have been prepared and stamped by a New Hampshire Licensed Professional Engineer.
- 3. Per Env-Wm 1402.05, a registration form shall be filed with DES prior to beginning operation of a new facility.
- 4. Per Env-Wm 1402.06, an amended registration form shall be filed with DES no later than 30 days after changing the use of or substantially modifying an existing AST system.
- 5. Per Env-Wm 1402.05(f), no person shall operate an aboveground storage facility which is not registered with DES.
- 6. Per Env-Wm 1402.30, all AST facilities shall have prepared and instituted a Spill Prevention Control and Countermeasure Plan in accordance with 40 CFR 112.

RETURN COMPLETED APPLICATION TO THE ADDRESS ABOVE:

March 5, 1997 Page 2 of 6

To facilitate the review process and reduce review time, please provide as much of the following information as possible, where applicable. Incomplete or missing information may be cause for rejection of submittal and/or extend review time.

NOTE: Any page may be copied and submitted as additional information

### I. FACILITY PLAN

THE FACILITY PLAN SHALL COMPLY WITH Env-Wm 1402.17 (b), REQUIREMENTS FOR APPROVAL OF AST SYSTEMS."

#### Facility/system plan shall include:

- (a) An accurate scaled diagram (22" X 34") showing a plan view of tank(s) location, all piping, transfer locations, structures, appurtenances, north arrow, and 100 year flood plain information.
- (b) A detailed tank diagram (22" X 34") showing secondary containment, leak detection, product type, piping (indicate slope and pipe cover depth, if underground), piping termination details, flex connectors, method of support (if aboveground), and material(s) specifications, vent(s), overfill protection, check valve(s), and material(s), specifications, complete engineering designs and documentation.
- (c) Description of the AST including capacity, construction, manufacturers name and address, model number, supplier's name and address, and any other supporting documentation on equipment and materials as necessary to describe the facility.
  - (d) Dated and signed New Hampshire professional engineer stamp.
  - (e) Site location (locus) map or USGS 7.5 minute series.

### II. TANK INFORMATION

ALL TANKS SHALL COMPLY WITH Env-Wm 1402.18, "TANK STANDARDS FOR NEW AST FACILITIES."

#### A. TANK

|   | TANK: | TANK: | TANK: | TANK: | TANK: | TANK: |
|---|-------|-------|-------|-------|-------|-------|
| a. Capacity in Gallons(nominal/actual)                      |       |       |       |       |       |       |
| b. Horizontal or Vertical tank?                             |       |       |       |       |       |       |
| c. Shop-fabricated or Field-erected?                        |       |       |       |       |       |       |
| d. Tank diameter  |       |       |       |       |       |       |
| e. Tank height/length                                       |       |       |       |       |       |       |
| f. Product to be stored                                     |       |       |       |       |       |       |
| g. Tank Manufacturer  |       |       |       |       |       |       |
| h. Foundation Type  |       |       |       |       |       |       |
| I. Is proposed tank double walled?                          |       |       |       |       |       |       |
| j. Is proposed tank fire protected iaw UL 2085?             |       |       |       |       |       |       |
| k. Is proposed tank in contact with the soil?               |       |       |       |       |       |       |
| I. Will proposed tank be installed in an underground vault? |       |       |       |       |       |       |
| dditional Comments/ Information:                            |       |       |       |       |       |       |

|                       |                           |              |
|                       |                           |              |

Please include a cut sheet detailing the specification for the proposed equipment used for interstitial monitoring.

## VIII. SPILL PREVENTION CONTROL AND COUNTERMEASURE (SPCC) PLANS

PER Env-Wm 1402.30, ALL FACILITIES SHALL PREPARE AND IMPLEMENT A SPILL PREVENTION CONTROL AND COUNTERMEASURE (SPCC) PLAN IN ACCORDANCE WITH 40 CFR 112.

SPCC PLANS SHALL BE CERTIFIED BY A LICENSED PROFESSIONAL ENGINEER.

Owners shall maintain their SPCC plan on the AST facility, unless it is unmanned, then it shall be available for inspection during a normal workday.
